buildings is [REDACTED] A rail spur which enters the site from the NW branches into seven additional spurs in a forklike arrangement; the storage buildings are located along these spurs. The buildings are not re- vetted, but they are approximately 365 ft apart and are surrounded by trees which could provide blast protection.

25X1B

[REDACTED] In addition to the storage buildings there is a possible bunker or buried tank in a clearing in the northeastern part of the site.

Security. The storage site is enclosed by a cleared strip which probably contains a single fence. A road which appears to be little used

and which probably was constructed before the storage site existed enters the site at its SE corner. There is no guardhouse where this road enters the site. A guardhouse is visible at each entrance which appears to be in use. Additional security is provided by the forest which surrounds the site.

Housing and Administration. A small housing and administration area is visible near the main rail and road entrance to the site. Seven buildings are visible in this area.
